Occupational Exposure Limit (OEL), 8 h TWA: Inorganic dust 10 mg/m³

8.2 Exposure controls

To control potential exposures, generation of dust should be avoided. Further, appropriate protective equipment is recommended. Avoid direct contact. Take care of good hygiene practice.

Appropriate engineering controls

If user operations generate dust, use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne dust levels below recommended exposure limits.

Individual protection measures, such as personal protective equipment

a) Eye/face protection

For powders, tight fitting goggles with side shields, or wide vision full goggles.

b) Skin protection

Wear suitable protective clothing to protect against splatter and dirt.

c) Respiratory protection

A suitable particle filter mask type P3 is recommended, depending on the expected exposure levels.

d) Thermal hazards

The substance does not represent a thermal hazard, thus special consideration is not required.

Environmental exposure controls

All ventilation systems should be filtered before discharge to atmosphere. Avoid releasing to the environment. Contain the spillage. Collect carefully as dry. Avoid formation and spreading of dust. Collect sealed container. Recycle if possible or dispose in accordance with waste regulations. Rinse area with water. Any large spillage into watercourses must be alerted to the regulatory authority responsible for environmental protection or other regulatory body.
